SUMMARY

Aspiring Java Full Stack Developer (B.Tech, 2027) with hands-on frontend experience and growing backend skills in Servlets, JSP, Hibernate, and Spring Boot. Built responsive UIs and REST-integrated dashboards as part of a team project. Strong foundation in Java, DSA, OOP, and JDBC; seeking an entry-level role to build production-grade applications in a collaborative Agile team.

EDUCATION

B.Tech in Data Science — MIET, Meerut Sep 2023 – Jul 2027

CGPA: 8.0 / 10.0

Class XII — Dev Memorial Public School, CBSE 2021

Percentage: 87.2%

Class X — Modern Delhi Public School, CBSE 2019

Percentage: 80%

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design

Backend: Java, Python (Basic), REST API, JDBC, Servlets, JSP, Hibernate, Spring Boot

Databases: MySQL, PostgreSQL

Tools & Concepts: Git, GitHub, VS Code, Agile/Scrum, DSA, OOP, Multithreading, Exception Handling, Operating Systems

PROJECTS

Foodies — Full-Stack Food Delivery Platform

Repo: github.com/VishalMalik002/Foodies-Food-Delivery | Live: foodies-food-delivery-production.up.railway.app

- Built a full-stack food delivery platform with Java, Spring Boot, Spring Data JPA/Hibernate and MySQL, covering restaurants, menus, cart, checkout, coupons, payment handling (incl. Cash on Delivery), orders and reviews.
- Secured REST APIs with Spring Security, JWT authentication and BCrypt password hashing, with role-based access for customer, admin and delivery users.
- Implemented delivery assignment, status and GPS/location updates, and deployed the backend online on Railway.

Eco Track — Smart Waste Management System

Repo: github.com/VishalMalik002/Eco-Track-Website

- Engineered the complete frontend using HTML5, CSS3, and JavaScript, turning real-time waste-tracking data into an interactive dashboard.
- Built responsive, mobile-first UI components for a consistent experience across screen sizes and devices.
- Integrated REST API endpoints with the backend team to dynamically render live tracking data on the UI.
- Collaborated with a cross-functional team using Git & GitHub in an Agile workflow.

Tourism Website

Repo: github.com/VishalMalik002/My_Tourist_Website

- Built a fully responsive tourism web application using semantic HTML5, CSS3 Flexbox/Grid, and interactive JavaScript features.
- Ensured cross-browser compatibility and mobile-first design for a smooth experience across devices.

TRAINING

Java Full Stack Development Training — Wipro

- Core curriculum: Servlets, JSP, Hibernate, Spring Boot, and Core Java (Multithreading, Exception Handling).

CERTIFICATIONS

- Web Development — Tech Vedhu, completed September 7, 2026 (Certificate ID: TV8765881795).
- 30-Days SQL Micro Course — Skill Course E-Learning Platform (ISO 9001:2015 Certified), completed July 14, 2026.
- Solved 100+ Data Structures & Algorithms problems on LeetCode (profile: Vishal__Malik).
